I'm a graphics design mayor graduated with **honours** in the **Saint Thomas Aquinas University of the North** in Tucumán, Argentina.

I started my journey doing **web design** and **UX/UI** work for big software companies when internet was booming. After a long time working on design I met my wife and we started working together.

I've done **design and branding work** for the most prestigious companies and institutions in the province. I also studied **animation** and **video** editing online and started producing **institutional videos** for the same companies I did design for.

I've worked for **television**, and my latest incursion was in **event visuals and stage design**.
